

hello my name is gorge c mullins my amateur call sign is KC8QWW i am a technician i have learning disability and a medical disability that stop me from learning the morse code test for my general license but the radio amateur foundation is trying to make it hard for technician to get a general license because they want to keep the morse code requirement they want to keep new ham from getting a license by not letting public get study how can new ham pass the test this why i oppose this petition RM-10868 because i think they want to control the amateur radio air waves every body should have a chance to get a ham license so please dont let it happen and the fcc can stop them thank you.
